NammaSpace: Proof of Concept and Web Viewer Links

Team Matrix · Chepuri Dathatreya · IIT Techfest 2026, Round 1

Free-roaming web viewers (open in any desktop browser, nothing to install)

Scene	Link
Room (best scene)	https://namma-space.pages.dev/room/
Hallway and Bedroom	https://namma-space.pages.dev/hallway/
Early Bedroom	https://namma-space.pages.dev/bedroom/
All scenes, project page, demo video, report	https://namma-space-documentation.pages.dev/

How to roam

Click inside the scene, then use **W A S D** to walk, the mouse to look, **Shift** to run, **Space** to jump and **Esc** to free the mouse. **R** returns to the door, **M** shows the collision grid and **N** the live map. Walls and furniture block you. Adding **?debug** to the address shows a performance panel. On a laptop with two GPUs, set the browser to use the high-performance GPU for the best frame rate; the viewer lowers its detail automatically and says so if the frame rate is low.

Code repository

https://github.com/chepuridathathreya/Namma-Space (public). Setup instructions are in the README; the sample data is in `test/sample_scene.zip`.
